DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/21/2008 has been entered.

Response to Amendment

2. This action is responsive to the amendment and remarks submitted 05/21/2008. Claims 1-7 are canceled. Claims 8-14 are amended. Claims 15-19 are newly added. Claims 8-19 are currently pending in the Application.

Response to Arguments

3. In view of the amendments to the claims, the previous 35 USC 112, first paragraph rejections are hereby withdrawn.

4. Applicant's arguments, see pages 6-7, filed 05/21/08, with respect to claims 8, and 13 have been fully considered and are persuasive. The previous rejections of claims 8 and 13 have been withdrawn.

Claim Objections

5. Claims 8 and 13 are objected to because of the following informalities: the portion of the equation $W/\tan(\sin)^{-1}$ appears to contain a typographical error, as the sin portion does not contain an argument. Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 8-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 8 and 13 are indefinite because the metes and bounds of the claim can not be determined. The claim limitation "wherein a distance L along the path from a light input surface of the waveguides to a light output surface of the waveguides satisfies the following equation" does not properly define the variable L, as it simply requires a distance, any distance, along the path from the input to the output surface to be in a specific range, making the claim indefinite. The Examiner recommends the language "wherein an optical path length L from a light input surface of the waveguides to a light output surface of the waveguides satisfies the following equation:", as it defines L with respect to the previously claimed structures. The Examiner and Applicant's representative Daniel Shim (Reg. No. 56,995) spoke, during a telephone conversation on 09/12/08, about these possible amendments but failed to reach an agreement.

Allowable Subject Matter

8. Claims 8-19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
